

## EP15-Grout | Project Profile

**PROJECT: NEPTUNE WATER TREATMENT FACILITY**

**LOCATION: CASPER, WYOMING**

**PRODUCT: EP15-GROUT**

### PROJECT CONCERNS

Cold Temperature winter installation and proper alignment and support of Sulzer Pump.

### EP15-GROUT HIGHLIGHTS

- **LOW DUST**
- **100% SOLID EPOXY**
- **LOW ODOR**
- **HIGH STRENGTH**
- **EXCELLENT FLOW**
- **PUMPABLE**
- **MOISTURE INSENSITIVE**
- **GOOD WORKING TIME / POT LIFE**
- **HIGH EFFECTIVE BEARING AREA**

### PROJECT RESULTS

E-Chem provided detailed instructions for preparation of foundation and required installation equipment. The contractor's crew was trained on proper mixing and placing. Both the contractor and owner were impressed with the flow at this temperature (60F-65F). All grout contained full loading of aggregate (4 each 60 lbs bags) alleviating concerns about reduced volume or loss of physical properties. There were very few noticeable bubbles (< 1 per sf) on the finished surface. With E-Chem professional and experienced direction the installation was flawless.
