

EP15-Grout | Project Profile

PROJECT: FOUNDATION REHAB

LOCATION: LYMAN, WY

PRODUCT: EP15-GROUT

PROJECT CONCERNS

RE-GROUT 2 COOPER GMV 10S WITH TAPERED OIL PANS

EP15-GROUT HIGHLIGHTS

- **LOW DUST**
- **100% SOLID EPOXY**
- **LOW ODOR**
- **HIGH STRENGTH**
- **EXCELLENT FLOW**
- **MOISTURE INSENSITIVE**
- **GOOD WORKING TIME / POT LIFE**
- **HIGH EFFECTIVE BEARING AREA**
- **HIGH FLOWABILITY UNDER TIGHT CLEARANCES**

PROJECT RESULTS

The contractor chose to make two separate pours. The first was a leveling pour 1"-1.5" and the final pour was 2.5"-3" deep. There were two main sections 286" x 46" x 5" and 286" x 39" x 5" with an oil pan running down the middle. This pan (34" wide) was 1.5" deep at fly wheel end tapered down to 0" at the far end.

The trick was to have as much material flow under the oil pan as possible to insure full contact.

The contractor chose EP15 grout to make sure this was accomplished.
